

Power Income Fund: A Global Tactical Income Strategy

FUND GOAL

The fund's primary investment objective is total return from income and capital appreciation. It has a secondary objective of capital preservation. We find income opportunities across the three major asset classes – global fixed income, global equities and alternatives. We believe this orientation is critical to both short- and long-term investment success.

POTENTIAL BENEFIT TO INVESTORS

- Seeks high current income and preservation of capital during market declines
- Invests in ETFs across asset classes, primarily fixed income and to a lesser extent equities and alternatives
- Tactically manage risk and opportunity with a long-term global macroeconomic view

PORTFOLIO'S FOUR FUNDAMENTAL PRINCIPLES

GLOBAL ALLOCATION

Global diversification across asset classes seeks to reduce portfolio risk and volatility by limiting exposure to individual risk factors

FUNDAMENTAL ANALYSIS

Forward-looking risk assessment through fundamental analysis seeks to anticipate market events and trends rather than reacting to them

TACTICAL MANAGEMENT

The Fund seeks to adapt to evolving risks and opportunities, rather than switching quickly between assets

RISK MANAGEMENT

All W.E. Donoghue portfolios have the ability to raise cash or short-term Treasuries to help reduce the risk of the portfolio during volatile market downturns

KEYS TO OUR APPROACH

W.E Donoghue & Co., LLC's Power Income Fund is designed for those looking to find income and believe their investment also needs to be managed to try to mitigate market risks.

- W.E. Donoghue believes that diversifying assets globally while actively managing exposure to all three major asset classes: equities, fixed income, and alternatives is critical to both short- and long-term investment success for global strategies.
- This strategy combines a tactical and strategic top-down macro approach to asset allocation.
- The Power Income Fund invest in liquid, low-cost exchange-traded funds (ETFs) based on a long-term secular view with tactical positioning during the shorter-term business and credit cycles.
- The fund does not short or use levered ETFs.

INVESTMENT ADVISER TO THE FUND

W.E. Donoghue & Co., LLC is a tactical investment firm that has specialized in risk managed portfolios since 1986. The firm currently manages over \$3.0 billion* in assets under management or advisement.

At the end of 2017, W.E. Donoghue acquired JA Forlines Global, which had previously managed the JAForldines Global Tactical Portfolios. The same team that managed the JAForldines portfolios prior to the acquisition, including John Forlines, continue to manage the portfolios.

The portfolios team's monthly meetings drive strategy and tactics and have inputs from Senior Advisors, proprietary contract research and portfolio consultants. W.E. Donoghue utilizes an internal financial conditions analysis that is geared specifically towards the global tactical allocation investment style of the portfolios.

John A. Forlines III, Chief Investment Officer of W.E. Donoghue and portfolio manager for the JAForldines Global Tactical Portfolios, was formerly Chairman and CIO of JA Forlines Global when it was an independent investment adviser. Before founding JA Forlines Global, Mr. Forlines was President of Core Asset Management. Mr. Forlines brings over 25 years of experience as an analyst, investment banker, and portfolio manager. Before joining Core Asset Management, Mr. Forlines spent 16 years at J.P. Morgan as a structured product specialist, senior investment banker, and business unit leader. Mr. Forlines graduated from Duke University with Honors in English and Economics and Duke University School of Law. He is a Professor in the Department of Economics at Duke.

Important Risk Information

¹The asset allocations are presented to illustrate examples of the asset allocations that the fund can allocate to and the diversity of areas in which the funds may invest, and may not be representative of the fund's current or future investments. Asset allocations are subject to change and should not be considered investment advice.

²The Blended Benchmark Income is a benchmark comprised of 90% Bloomberg Barclays Global Aggregate Bond Index (Bar Global Agg) Index, & 10% MSCI ACWI, rebalanced monthly. The Barclays Global Agg Index is a flagship measure of global investment grade debt from twenty-four local currency markets. This multi-currency benchmark includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers. The Bloomberg Barclays U.S. Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The MSCI All Country World Index (MSCI ACWI) is a free float adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. You cannot invest directly into an index.

ETFs are subject to investment advisory fees and other expenses, which will be indirectly paid by the Fund. As a result, your cost of investing in the Fund will be higher than the cost of investing directly in other mutual funds and ETFs and may be higher than other mutual funds that invest directly in fixed income securities and equities. When the Fund invests in fixed income securities, the value of the Fund will fluctuate with changes in interest rates. Defaults by fixed income issuers in which the Fund invests will also harm performance. Investing in the commodities markets may subject the Fund to greater volatility than investments in traditional securities.

As with all mutual funds, there is the risk that you could lose money through your investment in the Fund. The net asset value of the Fund will fluctuate based on changes in the value of the equity securities in which it invests. Hedging strategies may not perform as anticipated by the adviser and the Fund could suffer losses by hedging with underlying money market funds if stock prices do not decline. If money market funds are utilized, such Underlying Funds are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, your cost of investing in the Fund will be higher than the cost of investing directly in Underlying Funds and may be higher than other mutual funds that do not invest in Underlying Funds.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Power Income Fund.
